

Radios, Inc.

PF-TI-100

Radios, Inc.'s programming fixtures are custom made fixtures capable of in-circuit programming any Texas Instruments part. With the PCB secured in a custom made nest, spring loaded programming pins are lowered and lock into place with a magnetic catch. When programming is complete the pins release back into the up position and the next PCB can be inserted.

This fixture is easily adaptable to any shape circuit board and pad configuration. Ball bearing bushings and spring loaded pins ensure smooth movement and consistent pin-to-pad contact. These fixtures are efficient, durable, and easy to use.

Key Features:

- Garolite base
- Spring loaded programming pins
- Ball bearing movement
- Custom made to fit board size and shape
- Suitable for RF wireless devices
